

MULTIMIX - SERIES

Safe mixing of adhesives and sealants at temperatures up to 180°C under free from air- and free from moisture condition.

Picture 1: Closed process tank
Mixer 10 or 25 Liter

Picture 2: Open process tank
Mixer 1 or 4 Liter

Our MULTIMIX has to offer:

- Short mixing cycles effected by the iTec-Planetary system, due to the fact that the raw materials with their different properties will be fast and optimal coated and liquids can be incorporated under vacuum.
- Air- and moisture free mixing and dispersing
- Disposable packages can be used
- Heat- and coolable, temperature range up to 180°C
- Thermocouple directly located in scraper
- By featuring a forced ranging of the product by the dissolver no local hot spots can occur.
- Variable batch-sizes
- Product-specific mixing- and dispersing tools
- One-, two- or three-shaft versions are available
